Attn: Mr. Norman B.M Lee

Dear Mr Norman

Ref: Performance Monitoring of CCP # 1 and 2

We would like to acknowledge ACTSYS's contribution in helping Tuas Power Ltd to achieve better energy efficiency in our gas fired combined cycle plants. ACTSYS has been engaged by Tuas Power Ltd to conduct performance monitoring study for the Combined Cycle Plant # 1 and 2 at Tuas Power Station under the Service Contract No PO-SO 2004700346 – 26.03.2004. The study has identified the possible energy losses in the power generation cycle and the findings are useful for the improvement of energy efficiency of our plant performance.

Thank you

Yours faithfully,

Lau Tai Hwee
Vice President (Generation)
Tuas Power Ltd
